SUMMARY

Computer Engineering graduate with web development training from Conestoga College, focused on fintech, banking technology, and user-centered web products. Built NorthStar CAD Bank, a Canadian online banking prototype demonstrating account dashboards, CAD balances, credit products, E-Transfer flows, biometric login controls, support content, and realistic demo users. Combines UI/UX internship experience with current shift-management experience handling payment operations, transaction accuracy, and customer-facing service workflows.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, AngularJS basics | **Backend:** Node.js, REST APIs | **Database/Data:** SQL, Excel, Google Sheets | **Design:** Figma, UI/UX, prototyping | **Tools:** Git, GitHub, VS Code, AI tools | **Domain:** Fintech concepts, digital banking, payment workflows, Agile/Scrum

PROJECTS

NorthStar CAD Bank - Online Banking Prototype

AngularJS, Node.js, JavaScript, HTML, CSS, Fintech UX | github.com/Prajit-Parmar/northstar-cad-bank

- Built a Canadian banking prototype with authenticated dummy users, CAD chequing and savings balances, credit card state, offer screens, support content, and profile flows.
- Designed the user experience around account clarity, transaction confidence, dashboard scanning, and realistic banking copy for recruiter walkthroughs.
- Implemented E-Transfer style recipient flows and biometric login controls to show product thinking around trust, access, and everyday financial tasks.

Personal Finance Tracker - Budgeting Dashboard

HTML, CSS, JavaScript, LocalStorage, Fintech UX | prajit.it/finance-tracker/

- Created a browser-based finance tracker for income, expenses, categories, net cash flow, and spending-by-category summaries.
- Used local storage for a lightweight demo experience and framed the interface around simple money-management decisions.

WORK EXPERIENCE

Shift Manager | Pizza Hut - Brantford, Ontario, Canada

Crew Member: Mar 2024 - Apr 2025 | Shift Manager: Apr 2025 - Present

- Promoted from Crew Member to Shift Manager in Apr 2025 after consistently handling high-volume service, closing responsibilities, and team coordination.
- Lead front-of-house and kitchen teams during peak periods, coordinating order flow, staffing, and customer escalations.
- Handle payment operations including POS transactions, cash balancing, order corrections, and end-of-shift reconciliation.
- Maintain transaction accuracy under pressure, building practical experience with customer-facing financial workflows.

UI/UX Design Intern | Alien Software - Anand, Gujarat, India

During B.Tech

- Designed and prototyped user interfaces for client projects using standard design tools and iterative feedback.
- Collaborated with developers to translate wireframes into functional, user-friendly interfaces.
- Gained hands-on experience in user research, visual design, layout systems, and product iteration.

EDUCATION

Web Development Diploma | Conestoga College - Ontario, Canada

B.Tech, Computer Engineering | A.D. Patel Institute of Technology - Gujarat, India

WORK AUTHORIZATION

Valid Canadian work permit. Open to remote, hybrid, and in-person roles in Canada.
